| | Strung without problems. My previous test at 23/24 was a bit too tight. After playing for one hour at 21/22 I really started enjoying this string, mostly due to its great control. Durability is great if you consider the gauge and the number of miss hits I had. Tension stability is also great. From my point of view the Signum Pro Poly Plasma 1.23 plays a bit softer. Could become my new standard string for 2007. Here I am rating the combination of 1.23 mains and 1.10 crosses. | | | | | | |
